

CCL

Labelling Solutions

CCL Design Scotland

CCL Design in East Kilbride specialises in the design and manufacture of:

- Pressure-sensitive labels
- Precision die-cuts and functional components
- Printed electronics
- Branding and decorative products
- Brand security and anti-counterfeit solutions
- Coated films, materials and adhesive tapes

With market-leading manufacturing capabilities as well as a materials science-focused design centre, we offer:

- 40 years of industry expertise
- An extensive range of R&D capabilities
- Custom solutions with rapid prototype development
- In-house raw materials
- Uncompromised site and product security

Quality Standards

CCL Design has many years experience developing superior labelling, and is certified to the most widely recognised international security, quality and environmental standards.

Our products also have UL and cUL recognition for marking and labelling systems.

Safety Signage and Surface protection

As we all start to return to work and resume services, it is critical that social distancing is maintained.

CCL labels consist of a range of floor, wall and door signs to encourage social distancing in the workplace. These are highly visible, durable and self explanatory.

Product Range- Floor Marking

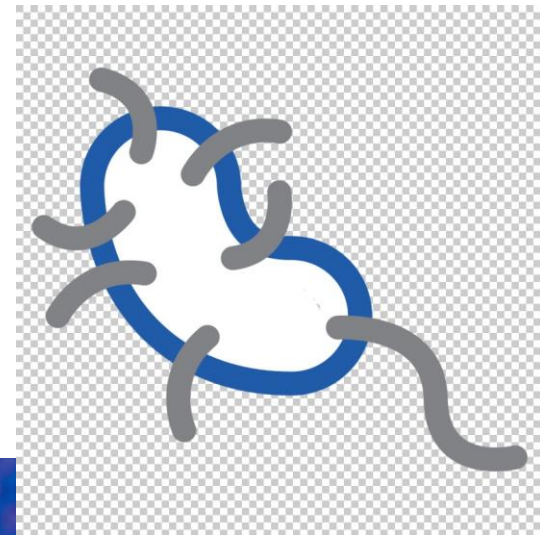

- Distancing and one way routes
- Permanent or Removable adhesive
- Tested to BS7976-2 slip rating approval
- Customisation of artwork
 - Customers own logo design
 - Language variants
 - Brand logo colours
 - Specific Message

Product Range- Anti-microbial Products

Traditional use for Anti-microbial products

- Hospitals and medical centres
 - Surgical instrument holders
 - Operating theatre surfaces
 - Hospital wall paint
- Pharmaceutical and Healthcare labelling
 - Dosage instruction labels
 - Booklet labels
 - Product labelling

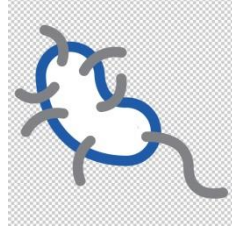

Product Range- Anti-microbial Products

All surface labels have been manufactured using special coatings that incorporate anti-microbial technology which offers protection when used on multi user hard surfaces

- Hand Sanitising stations
- Door marker instructions
- Desk and table tops
- Reminders – wash hands regularly

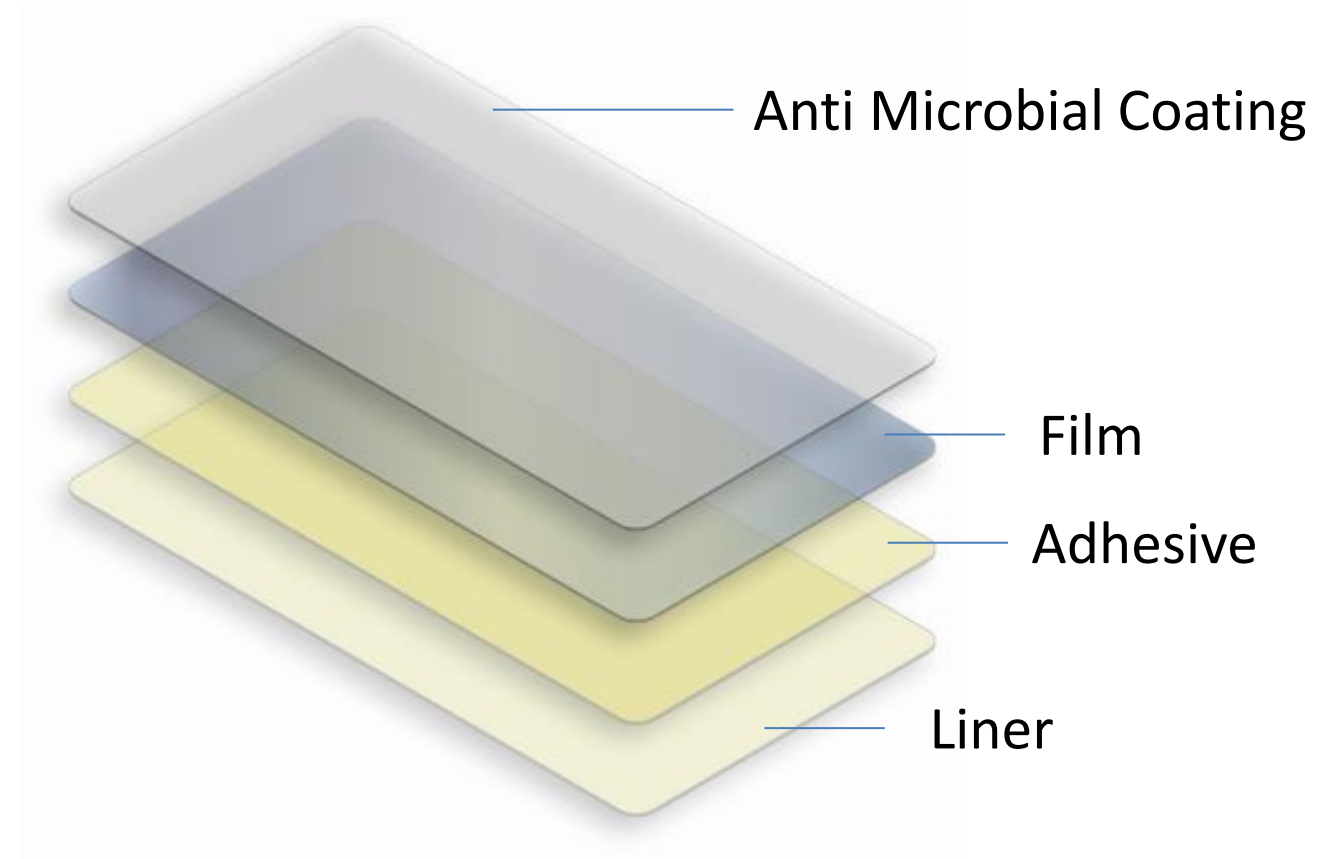

Anti Microbial Film

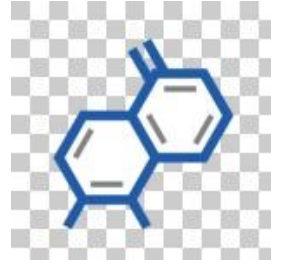

CCL Design has created an anti microbial film for use in a number of applications to help get people back to work, school and into a 'new normality'. Features of the product include:

- Approved by independent lab to BS EN ISO 22196 global anti-microbial standard
- Eradicates the bacteria which cause contamination and infection, as well as those responsible for odours and staining
- Acts as a complementary measure to routine cleaning
- Active substances used have been successfully tested against other enveloped viruses, such as Influenza, Avian flu and SARS. Surrogate viruses to COVID-19
- Offers continuous and permanent protection against microbes
- Excellent protection against Bacteria, Biofilm, Fungi and Mould
- Products are REACH compliant

Benefits of Antimicrobial Coating

- Proven Efficacy : 99.99% reduction of bacterial growth eg E-coli , MRSA
- Active 24/7 : Consistently present on the surface of treated materials, ready to release 24/7
- Added levels of protection: Complements and extends the effectiveness of standard chemical cleaning routines.
- Durable : Remains effective even if the surface is chipped or scratched.
- Non-leaching: Stays inert until it releases the antimicrobial element just enough to inhibit the bacteria's metabolism and prevent reproduction. The technology does not wash off, wear away or leach out of the materials
- No adverse effect on the physical properties of the materials and adhesives used

Applications

Multi-user hard surfaces – doors / desks / tables

- Safety and 5S applications in offices and workplaces
- Public Health Awareness for social distancing and handwashing
- Re-enforcement of health and safety advice at multi-user workstations
- Customisation for logo or message

THANK YOU
