

The 5<sup>th</sup>

# UK Algae Conference

University of Glasgow | School of  
Engineering

10<sup>th</sup> July 2015

John McIntyre Building, Room 201

A microscopic view of several large, spherical algae cells with multiple concentric layers and internal structures, set against a background of smaller, more numerous cells.

The 5<sup>th</sup> UK Algae Conference will gather algae sector professionals from academia and industry alike. It is also an opportunity to network with your peers as well as leading academic scientists, policy makers and business managers who have influence in the algae sector. Discover and share pioneering algae research, from applications in wastewater bioremediation, biofuel development, photobioreactor design and technology, genetic, photosynthetic and lipid research and more.
